

INTERACTIVE FOIL

If you are looking to take advantage of the expanding market for through window/glass touch screen applications then the VIP Interactive foil is the solution for you.

HOW DOES IT WORK?

VIP lightweight touch foil can be applied directly to a window or a glass sheet and then a rear projection screen or LCD can be mounted behind the touch foil to create a through-window/glass touch experience.

The VIP Interactive foil can be mounted using either a permanent or a removable fixing method allowing the touch unit to be moved to another location if required.

The touch foil is ideal for upgrading existing through window rear projection or LCD displays to create a through window touch experience.

There are no external components required with the VIP Interactive foil so the installation is completely safe behind the window.

WHY SHOULD YOU BUY IT?

Interactive Foil is ideal for Retail, Corporate, Entertainment, Education and Local Authorities. This product has unlimited potential. Brochures, offers, advertising & information can all be displayed, viewed and interacted with in any window environment. This system would allow people in the street to make choices regarding products and services by simply touching a window, even when you are closed.

Features

- ▶ Lightweight foil simple to apply to a window, glass, acrylic and rear projection screens
- ▶ No requirement to have any external wires or devices as all of the touch screen components are situated safely behind the glass
- ▶ Interactivity works even with gloved hand
- ▶ Not affected by external light conditions
- ▶ Wide range of screen sizes available up to 100" 4:3 or 16:9 format
- ▶ Works with all existing multimedia applications PowerPoint, Macromedia flash, Web sites etc.
- ▶ Simple set-up
