

Software Services

Lets pull together to take the hard work out of software.....

Today's business activities rely more and more on the critical applications or functionality provided by software packages running on the company IT infrastructure.

Working with a partner who understands the needs of your business can be as critical as the applications themselves, that's why we at Comcen take pride in the software services and solutions we offer to our clients.

We offer a range of software services.....

The variety of solutions or services that we offer around software is substantial, but as a guide we are able to provide solutions in the following areas with a broad range of product partners:

- Mail Services (anti virus, anti spam, etc)
- Content management, in house and external control (mallware, etc).
- Upgrade & Migration (operating systems, exchange, SBS, etc)
- Backup implementation & best practice
- Remote backup
- Data recovery
- Virtualisation
- Licensing
- Imaging
- AV & Firewall

This list is by no means exhaustive and only represents some areas of our expertise

Your business is our passion.....

At Comcen we are passionate about your business and assisting you to deliver a real value added solution that not only meets your needs now, but are also flexible enough to grow with you, to meet your future business requirements.
